**摘要:** This article reports that the regions of the Earth that have contributed least to **global warming**, most notably Africa, are the most vulnerable to its harmful effects. The article also explores the health dangers associated with climate change in cities and on coastal populations. Large cities experience "urban heat island effect," which can cause health problems. Coastal flooding as a result of storm surges will affect up to 200 million people by 2080. The highest risk coastlines are along the Pacific and Indian Oceans and in sub-Saharan Africa. The article also discusses the need of fast growing economies like **China** and India to develop sources of sustainable energy.

部分:

SPECTRUM

The places that have contributed the least to **warming** the Earth are the most vulnerable to the death and disease higher temperatures can bring, according to a 16 November report in *Nature*. Health and climate scientists at the University of Wisconsin-Madison and the World Health Organization (WHO) have shown that the growing health impacts of climate change affect different regions in markedly different ways.

Africa has among the lowest per capita emissions of greenhouse gases, yet regions of the continent are at an increased risk for **warming**-related disease. Many of the most important diseases in poor countries, from malaria to diarrhea and malnutrition, are highly sensitive to climate," says coauthor Diarmid Campbell-Lendrum, a scientist at the WHO Department for Protection of the Human Environment. "The health sector is already struggling to control these diseases, and climate change threatens to undermine these efforts.

Large cities that experience the "urban heat island effect" are also susceptible to temperature-related health problems. Flooding as a result of coastal storm surges will affect the lives of up to 200 million people

## Purpose and Scope

The ERIC Thesaurus is a list of terms representing research topics in the field of education. Descriptors from the ERIC Thesaurus are assigned to every document in the ERIC digital library to describe its subject content.

Terms in the ERIC Thesaurus represent the vocabulary used in the documents that comprise the ERIC digital library collection. Learn more about how the Thesaurus is updated in this [archived webinar](#).

The ERIC Thesaurus contains a total of 11,721 terms. There are 4,520 Descriptors and 7,068 Synonyms. There are also 133 Dead terms which are no longer used as Descriptors but remain in the Thesaurus to aid in searching older records. The ERIC Thesaurus was last updated in October 2015. The updated Thesaurus includes 19 new Descriptors, 28 new Synonyms, and changes to 17 existing terms. For more information, view the [full list of updates](#) and [download the updated file](#).

### 3. A consequence of school grade labels: preservice teachers' interpretations and recall of children's classroom behavior.

By: Ladd, Judith; Linderholm, Tracy. *Social Psychology of Education*. 2008, Vol. 11 Issue 3, p229-241. 13p. 1 Chart. DOI: 10.1007/s11218-007-9049-4. , Database: Education Research Complete

采用叙词表检索，比普通关键词检索的好处：

1. 精确搜索结果，确保每篇结果都是读者想要的，很少出现上千万篇结果。
2. 防止漏检，读者通常习惯看标题里面是否有关键词来判断该文章是否匹配，但是请注意本页第一篇和第二篇文章标题中都没有读者选的关键词，但是的确是相关度很高的文章。
